

Security Auditing Audit Collection Admin™

ACS Management & Optimization

Fully leverage the Audit Collection Service (ACS) and optimize your auditing infrastructure. Using the Audit Collection Admin™ and the ACS Health MP, you can easily manage ACS via a centralized graphical console, improve ACS health monitoring and simplify capacity and performance planning activities for Forwarders & Collectors.

The Admin and Health MP combine Secure Vantage's experience from hundreds of ACS deployments into an easy to use, comprehensive solution that's fully integrated with the Operations Manager console.

ACS ADMINISTRATION

- AdtAdmin Console Tasks
- Collector Configuration
- Collector Performance
- Database Size & Health
- Event Load Analysis
- Forwarder Analysis
- Noise Filter Authoring
- Partition Health Summary

ACS HEALTH MP

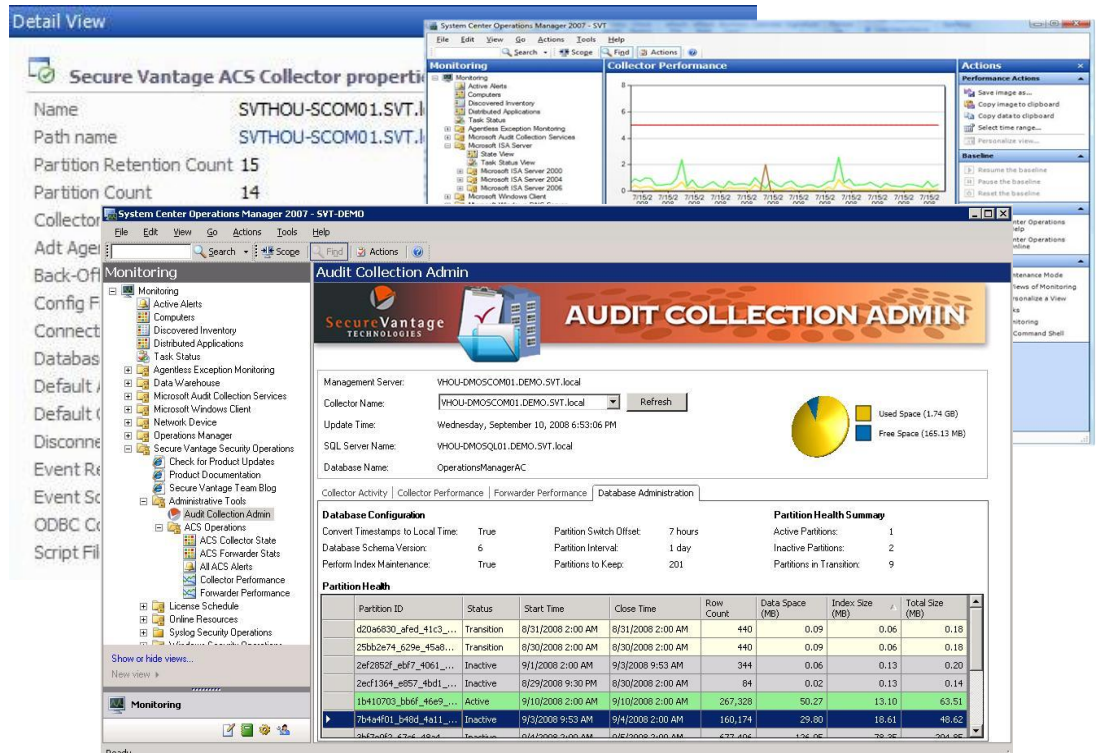

- ACS Performance Monitoring
- Extended Alerting Scenario's
- Health Model & State Views
- Rich Configuration Discovery

USABILITY

- Accessed via OpsMgr View
- Managed per Collector
- Multiple Collectors Supported

MIN. REQUIREMENTS

- Windows Server 2003 SP2 or Windows Server 2008 SP1
- Operations Manager SP1 or R2
- Audit Collection Service
- 32bit & 64bit Supported
- SQL 2005 SP2 with SSIS

The screenshot displays the 'Audit Collection Admin' interface within the System Center Operations Manager console. It features a navigation tree on the left, a central monitoring area with a 'Collector Performance' graph, and a 'Partition Health Summary' table. The table lists various partitions with their status, start/end times, row counts, and sizes.

Partition ID	Status	Start Time	Close Time	Row Count	Data Space (MB)	Index Size (MB)	Total Size (MB)
d20a6830_afed_41c3...	Transition	8/31/2008 2:00 AM	8/31/2008 2:00 AM	440	0.09	0.06	0.18
25b2e74_629e_45a8...	Transition	8/30/2008 2:00 AM	8/30/2008 2:00 AM	440	0.09	0.06	0.18
2ef2852f_ebf7_4061...	Inactive	9/1/2008 2:00 AM	9/3/2008 9:53 AM	344	0.06	0.13	0.20
2ef1364_e857_4bd1...	Inactive	8/29/2008 9:30 PM	8/30/2008 2:00 AM	84	0.02	0.13	0.14
