

# Security Auditing Audit Collection Archiver™

The Audit Collection Archiver™ provides unparalleled offline data management for the Audit Collection Service. Featuring a 5-10x offline compression ratio, the Archiver exports ACS audit partitions to offline compressed files for near-line storage and can eventually be moved to preferred offline storage. The Archiver also allows users to deploy an ACS audit historical database which provides aggregated data analysis across collectors and optimized data mining capabilities for the enterprise.

## OPTIMIZED ACS DATA MANAGEMENT & REPORTING

### ARCHIVE FEATURES

- 5 – 10x Compression
- Automates Audit Archives
- Built-in Encryption & CRC
- Grooming by Age

### ACS HISTORICAL DB

- Auto or Manual Archive Load
- Grooming by Age or Event
- Optimized Indexing & Views
- Reporting across Collectors
- Summary Data Reporting
- Supports MS & SVT Reports

### COMPONENTS

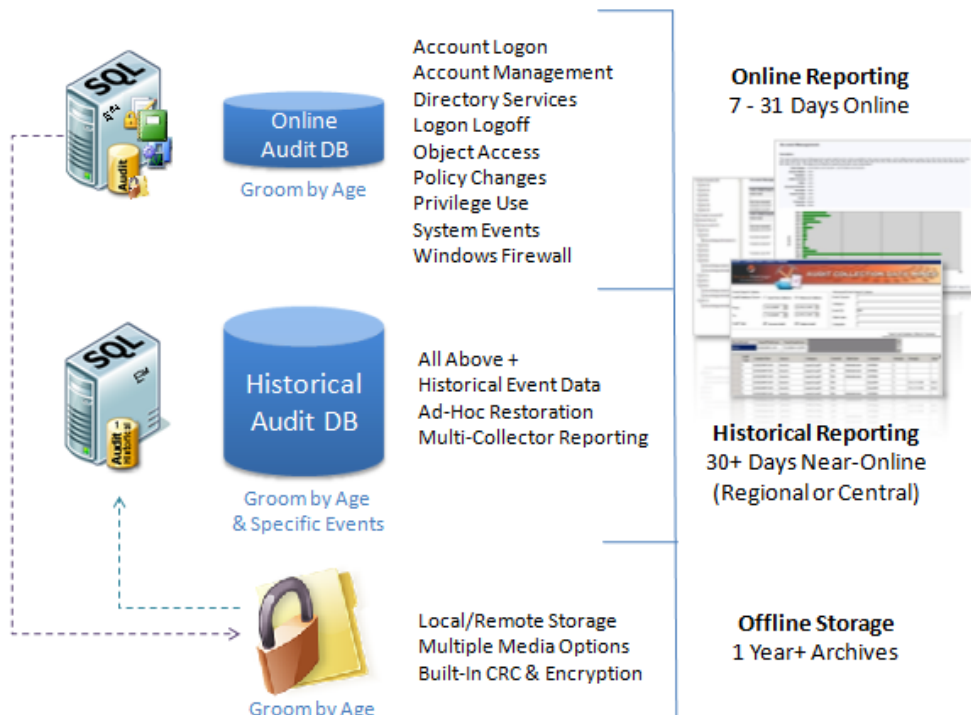

- Archiver Exporter
- Archiver Loader
- Archiver Load Manager
- ACS Historical Database

### PACKAGE CONTENTS

- Audit Collection Admin
- Audit Collection Archiver
- Audit Collection Reporting

### MIN. REQUIREMENTS

- Windows 2003 SP2
- Operations Manager SP1
- Audit Collection Service
- 32bit & 64bit Supported
- SQL 2005 SP2 with SSIS

*"Using SVT's Audit Collection Archiver in conjunction with Audit Collection Services in Operations Manager 2007, we've been able to lower the cost of that storage. In fact, we've already realized a 45-percent space savings through the compression features of the archiving tool."*
